React State Practice Tasks

Basic Tasks

1) Counter App:
   - Create two buttons: Increment and Decrement
   - The count should not go below 0

2) Input Field:
   - Create an input field where user input is shown in real-time in an h2 tag

3) Toggle Button:
   - Create a button that toggles between 'Show' and 'Hide' text

Intermediate Tasks

4) Todo List:
   - User can type text in an input field and click 'Add' to add it to a list
   - Each item should have a 'Remove' button to delete it

5) Background Color Changer:
   - Provide three buttons: Red, Blue, Green
   - Clicking a button changes the background color accordingly

6) Form Validation:
   - Form should have Name and Email fields
   - Show 'Please enter a valid email' if the email field is empty

Advanced Tasks

7) Stopwatch App:
   - Create Start, Stop, and Reset buttons
   - Timer should run in real-time

8) Accordion (FAQ Section):
   - Clicking a title should show/hide its description

9) Dynamic Tabs:

- Clicking on different tabs should change the displayed content
